Mark S. Frankel, PhD

Mark S. Frankel, PhD, is director of the Scientific Responsibility, Human Rights and Law Program at the American Association for the Advancement of Science (AAAS), the largest multidisciplinary scientific society in the world. There he develops and manages AAAS’s activities related to the ethical, human rights, and legal aspects of science and technology. At AAAS, he has directed projects on research integrity and scientific misconduct; advocacy in science; personalized medicine; and the implications of advances in neuroscience research for the legal system. Since 2006, he has organized nearly 20 seminars for federal, state judges and administrative law judges on how advances in neuroscience may affect the courts. In 2009, the seminars received the Judicial Education Award from the ABA Judicial Division’s National Conference of Specialized Court Judges. Frankel also directs the AAAS Project on Court Appointed Experts, which assists judges in identifying vetted scientists, engineers and health professionals to serve as independent experts for the court.

Dr. Frankel is a former member of the Boards of Directors of the National Patient Safety Foundation and the Food and Drug Law Institute and currently sits on the Board of the Center for Law, Science and Innovation at Arizona State University and the International Neuroethics Society. He serves on the editorial boards of Science and Engineering Ethics and the Journal of Empirical Research on Human Research Ethics. He is a Fellow of AAAS.
