

University of Maryland Baltimore UMB Faculty&Staff Wireless Client Configuration & Cisco Clean Access Installation – Quick Start Guide

1. View your available wireless networks, select UMB Faculty&Staff, then click on Connect
2. Once connected open Internet Explorer and you will see the Cisco Clean Access Installation screen. Enter your myUMB Username and password then click on Continue.
3. Click on Download Clean Access Agent 4.1.3.0, click on Run, then follow the installation prompts.
4. Enter your myUMB Username and Password when prompted, then click on Login. If prompted to install a Clean Access upgrade click OK and follow the installation prompts. Once the upgrade completes log in with your myUMB Username and Password.
5. When you are finished using the wireless network be sure to log out of Clean Access by right clicking on the Cisco Clean Access icon then clicking Logout.

Future connections to the secure wireless network will only require the following steps:

1. Open the Windows Wireless Network Client, select UMB Faculty&Staff, then click Connect.
2. Do not open Internet Explorer yet. The Cisco Clean Access Agent will start and prompt you to authenticate. Enter your myUMB User Name and password. Leave the Please select your authentication provider: at the default selection and Click Login.
3. When you are finished using the wireless network be sure to log out of Clean Access.
